## **Dosmatic USA Introduces New SuperDos® and MixPro® Injectors for Wettable and Soluble powder. Now available for multiple market applications.**

**Carrollton, Texas – June, 2010** – Dosmatic USA Introduces the New SuperDos (WSP) 2.5% and MixPro (WSP) (2%) for wettable and soluble powder. The new series offers same superior dosing and chemical compatibility as Dosmatic's liquid concentrate injectors.

The SuperDos (WSP) 2.5% is available in all flow range models; 15, 20, 30, 45, and 80 gpm and is offered on the MixPro 2% (WSP). A Wettable and Soluble Powder Lower End (WSPLE) conversion kit can be ordered for both models to convert an existing liquid concentrate for wettable or soluble powder injection. All (WSP) models and (WSPLE) kits can inject solution mixtures from either liquid concentrate, wettable or soluble powder.

"Our proven dosage piston technology remains the lower end of choice for extended wear life when injecting 100% liquid additives. However, a number of our customers are using wettable and soluble powder products for their injection applications," explained Sam Chandler, Dosmatic's senior vice president of sales. "Our (WSP) models and (WSPLE) kits take advantage of a unique dosage gasket designed to withstand the abrasiveness of suspended particles associated with wettable and soluble powder."

The SuperDos and MixPro (WSP) series and (WSPLE) conversion kits are now shipping. Dosmatic is currently developing WSP technology for more models and ratios and will soon be available. For more information please contact Dosmatic Customer Service/USA at 800-344-6767, Customer Service/Europe +33 (0)5 57 97 13 13 or visit [www.dosmatic.com](http://www.dosmatic.com).

### **About Dosmatic U.S.A. / International**

Dosmatic International, Inc is the industry leader in innovation and technology for non-electric, fluid-driven, proportional injectors and pumps. Dosmatic has grown from its headquarters in Carrollton, Texas to offices in France, Belgium, Thailand, Japan, Australia, Argentina and Brazil. The company exports products to more than 70 countries. Additionally, Dosmatic has an extensive worldwide network of 500-plus distributors and regional service centers. Dosmatic products are manufactured according to ISO 9001: 2008 Quality Management System.
